

## **SHERCO MOTORCYCLES**

### **2022 ROOF OF AFRICA – RACE SUPPORT PACKAGES – FOR SHERCO OWNERS/RIDERS**

Sherco will be offering Roof of Africa support packages for riders on any Sherco Motorcycle.

#### ***Our Main service area :***

The Main Sherco Service area will be located in the same position as 2021 event in front of our chalets at Thaba Bosiu Cultural Village. We will also setup a Roof Support Whatsapp group where information will be communicated before and during the event.

#### ***Important notes :***

Your bike prep for the event must be completed before leaving for Lesotho. Please contact your local Sherco dealer to perform this service before departure.

Any specific parts that you require us to take along for you, please let us have that list 7 days in advance before departure.

Your bike can remain at the main service area overnight to be collected the next morning on your way to the event start. The travel time from Thaba Bosiu to Bushmans is around 25 mins.

We will carry a selection of OEM parts to perform the services and repairs, but we cannot guarantee that we will have all the parts that you may require. We will have a spare bike on hand to assist with parts as well. Repairs limited to parts available.

We will also be able to do top-end replacements if no cylinder damage on bike.

You will be responsible to transport your bike to/from the main service area to the start/finish of the event.

In the case of the event being cut short or ending at a different place than the start/finish you will be required to transport your bike to the main service area at Thaba Bosiu Cultural Village

All spare wheels/fuel cans that you require us to fit/use at the DSP must be properly marked with your name and collected after the day from the main service area. We will have tags available on site.

Riders missing official cut-off times will have to make their own way to the main service area.
